

ALFONSO SCORNAVACCA

I am a very sociable person, which is why I adapt easily to new work groups.
I started as a web developer using JavaScript and its frameworks as my main language but I am currently focusing on Security and Cloud Administration, obtaining the Microsoft MS-500, SC-200 and AZ-900 certifications.

CERTIFICATES

2021

React escuela DevRock

DevRock is a virtual school in which they offer several courses on web development, at the moment I did the courses of HTML, CSS, JS y React Js

2021

Radium Rocket Full stack developer JS

Training provided by the Radium Rocket company that consists of learning to use different technologies to create a web app, both backend and frontend, working in a group using a GitHub repository. Among the technologies and languages used are: HTML, CSS, JS, NodeJS, Express, ReactJS, GIT, GitHub, Trello, Scrum.

2023

MS-500 Security Administrator Associate

Implement, manage, and monitor security and compliance solutions for Microsoft 365 and hybrid environments. The Microsoft 365 security administrator proactively secures identity and access, implements threat protection, manages information protection, and enforces compliance. The Microsoft 365 security administrator collaborates with the Microsoft 365 enterprise administrator, business stakeholders, and other workload administrators to plan and implement security strategies. Functional experience with Microsoft 365 workloads and with Microsoft Entra ID. They have implemented security for Microsoft 365 environments, including hybrid environments. They have a working knowledge of Windows clients, Windows servers, Active Directory, and PowerShell.

2022

AZ-900 Azure Fundamentals

This exam is a common starting point in a journey towards a career in Azure.

You can describe Azure architectural components and Azure services, such as:

Compute

Networking

Storage

You can also describe features and tools to secure, govern, and administer Azure.

You should have skills and experience working with an area of IT, such as:

Infrastructure management

Database management

Software development

2022

MTA- JavaScript

Microsoft certification, basic knowledge in JavaScript

SC-200 Security Operations Analyst Associate

Certification details

As a Microsoft security operations analyst, you reduce organizational risk by:

Rapidly remediating active attacks in the environment.

Advising on improvements to threat protection practices.

Referring violations of organizational policies to appropriate stakeholders.

You perform:

Triage.

Incident response.

Vulnerability management.

Threat hunting.

Cyber threat intelligence analysis.

As a Microsoft security operations analyst, you monitor, identify, investigate, and respond to threats in multicloud environments by using:

Microsoft Sentinel

Microsoft Defender for Cloud

Microsoft 365 Defender

Third-party security solutions

In this role, you collaborate with business stakeholders, architects, identity administrators, Azure administrators, and endpoint administrators to secure IT systems for the organization.

As a candidate, you should be familiar with:

Microsoft 365

Azure cloud services

Windows and Linux operating systems
