

ALFONSO SCORNAVACCA

I am a very sociable person, so I easily adapt to new work groups. I started as a web developer using JavaScript and its frameworks as my main language, but I also have experience in low-code tools such as Power Automate, Power App, and Sharepoint.

I also have experience in JavaScript, mainly with ReactJS and TypeScript

2023

MS-500 Security Administrator Associate

Deploy, manage, and monitor security and compliance solutions for Microsoft 365 and hybrid environments. The Microsoft 365 Security Administrator proactively protects identity and access, implements threat protection, manages information protection, and enforces compliance. The Microsoft 365 Security Administrator collaborates with the Microsoft 365 Enterprise Administrator, business stakeholders, and other workload administrators to plan and implement security strategies. Functional experience with Microsoft 365 workloads and Microsoft Sign In ID. Have implemented security for Microsoft 365 environments, including hybrid environments. Have a working knowledge of Windows clients, Windows servers, Active Directory, and PowerShell.

2022

AZ-900 Azure Fundamentals

This exam is a common starting point on a path to a career in Azure. You can describe the architectural components of Azure and Azure services, such as:

Compute

Networking

Storage

You can also describe the features and tools for securing, governing, and managing Azure.

You should have skills and experience working with an area of IT, such as:

Infrastructure management

Database management

Software development

2022

MTA- JavaScript

Microsoft Certification, basic knowledge in JavaScript

SC-200 Security Operations Analyst Associate

Certification Details

As a Microsoft Security Operations Analyst, you reduce organizational risk by:

Rapidly remediating active attacks in the environment.

Advising on improvements to threat protection practices.

Referring organizational policy violations to appropriate stakeholders.

You perform:

Triage.

Incident response.

Vulnerability management.

Threat hunting.

Cyber threat intelligence analysis.

As a Microsoft Security Operations Analyst, you monitor, identify, investigate, and respond to threats in multicloud environments using:

Microsoft Sentinel

Microsoft Defender for the Cloud

Microsoft 365 Defender

Third-party security solutions

In this role, you collaborate with business stakeholders, architects, identity administrators, Azure administrators, and endpoint administrators to protect the organization's IT systems.

As a candidate, you should be familiar with:

Microsoft 365

Azure cloud services

Windows and Linux operating systems
